

Reduce, Reuse, Recycle

Reduce, Reuse, Recycle is the fundamental tenet of any environmental program and an important part of daily operations at Coyote Run. We adhere to the following environmental practices:

- recycle all cans, bottles, paper, cardboard, used oil, scrap metal, electrical devices, tires
- grass clippings from greens, tees and fairways are spread in the rough, clippings from green-banks, tee-banks and rough are left in place, adding to soil fertility
- in the autumn, all leaves are mulched in place
- a portion of the landscape waste is composted for use in planting beds
- tree waste is chipped and used as mulch
- currently investigating composting of food waste from Wiley's grill
